MEng Geodesy and Geomatics

E-mail: dechen.wangmo@unb.ca

Being born in the country driven by the developmental philosophy "Gross National Happiness", which emphasize environmental protection and sustainable development has always intrigued me to learn and understand more about the local environment and its problems that has detrimental effect in the environment. And geodesy and geomatics has been one of the tools needed to provide immediate attention to maintain its sustainability.

I have graduated from University of Petroleum and Energy Studies, Dehradun, India with Bachelors of Technology in Geo Informatics Engineering. I was working on historical aerial image for the geodesy and geomatics engineering department, UNB. I was working for Royal University of Bhutan before joining University of New Brunswick for pursuing my master's degree.
